

DFM EUROPE

NEW BRAND ON THE MARKET OF FIRE PARTITIONS

STEEL FIRE RESISTANT DOORS AND HATCHES **DFM**

www.dfm-europe.eu

PRODUCT DESCRIPTION

The **DFM DS** Steel Fire Resistant Doors and hatches are constructed from two zinc plated steel skins 0.75mm thick, with rockwool infill with a density of 120 kg/m³ in EI₂ 30 fire resistance class and 140 kg/m³ in EI₂ 60 class.

Door leaves and frames are factory powder coated in a selected colour from our standard colour range.

DFM DS Fire resistant doors are made in single or double leaf variants. They are suitable for both internal and external application.

Standard equipment:

- Mortise latch and bolt lock,
- Stainless steel U-form handle set on long shield,
- Cylinder and 3 keys,
- 2 pieces of customised stainless steel hinges,
- 2 security pins,
- Perimeter rubber gasket and intumescent gasket.

Optional equipment:

- Additional hinge or alteration of hinges to 3D adjustable model,
- Anti-panic locks and hardware concordant with EN 1125 and EN 179,
- Door closers concordant with EN1154
- Electric and electromotor locks,
- Electric strike plates and magnet contacts,
- Rectangular or round glass vision panels
- Fire resistant ventilation grills,
- Kick-plates of stainless steel,
- Magnet holders,
- Automatic dropping gaskets.

DOOR FRAMES

DFM DS door frames are made of moulded aluminium in thickness 3mm, corner (Z) design as standard, with choice of rectangular and wrap-round frame profiles. An upgrade to include a thermal break is also available.

Not only is 3mm aluminium frame more rigid than standard but it also provides an effective clear passage, wider than is the case with traditional steel frames.

Invisible angle connectors are used at the mitred joints on the frames. These weld-free joints achieve a quality, aesthetic finish.

Moreover, aluminium door frame do not carry the risk of corrosion in external or other potentially wet environments.

TECHNICAL DETAILS

Fire resistance:	EI ₂ 30 / EI ₂ 60
Smoke resistance:	S _a / S ₂₀₀
Mechanical resistance:	class 3 or 4 EN-1192
Mechanical durability / closing:	class 5 / 200.000 cykli
Acoustic insulation:	R _w = 34 ÷ 42 dB / R _{A1} = 32 ÷ 41 dB
Heat transfer coefficient:	1,1 ÷ 1,6 W/(m ² •K)
Corrosion resistance:	class: C3 / C4 / C5(M)

SINGLE LEAF DOOR**DFM DS 30-1** | **DFM DS 60-1**

Sizes of doors **DFM DS 30-1** and **DFM DS 60-1** inside frames:

- width: 533 mm ÷ 1250 mm
- height: 1550 mm ÷ 2500 mm

DOUBLE LEAF DOORS**DFM DS 30-2** | **DFM DS 60-2**

Sizes of doors **DFM DS 30-2** inside frames:

- width: 776 mm ÷ 2550 mm
- height: 1550 mm ÷ 2500 mm

Sizes of doors **DFM DS 60-2** inside frames:

- width: 776 mm ÷ 2506 mm
- height: 1616 mm ÷ 2508 mm

ALUMINIUM CORNER FRAME**ALUMINIUM WRAP-AROUND FRAME****ALUMINIUM RECTANGULAR FRAME****INSTALLATION OF STEEL DOORS DFM DS**

DFM DS Steel doors have innovative features to aid installation. Frame fitted elements, such as hinges and protective casings for lock bolt and security pins contain holes for threading steel screws or expanding anchors.

Screws / anchors threaded through plates of **DFM** customised hinges warrant solid door leaf fixing directly to the wall, thus preventing it from sagging.

CERTIFICATES AND SUPPLEMENTARY DOCUMENTS**DOORS FOR INTERNAL APPLICATION:**

National Technical Assessment
National Certificate of Constancy of Performance
Declaration of Performance

DOORS FOR EXTERNAL APPLICATION:

Certificate of Constancy of Performance
Declaration of Performance

DOORS AS A MEANS OF ESCAPE:

National Certificate of Constancy of Performance defines **DFM DS** as suitable for use in evacuation routes according to EN 1125

STANDARD OF MAKING

Stainless steel hinge

Stainless steel handle

Aluminium glazing frame

Thick door leaf rebate

Mortise latch and bolt lock

Stainless steel striking plate

PRODUCT DESCRIPTION

The **DFM DS HP Steel Fire Resistant Flush Doors** are constructed from two zinc plated steel skins 0.75mm thick, with rockwool infill with a density of 120 kg/m³ in EI₂ 30 fire resistance class, and a density of 140 kg/m³ in EI₂ 60 class. The total thickness of door leaf is 65mm.

The effective light weight of the door leaf minimises mechanical stress on the hinges, lock and door closer. This provides improving durability and service life.

Door leaves and frames are factory powder coated in a selected colour from our standard colour range.

DFM DS Fire Resistant Flush Doors are made in single and double leaf variants. They are suitable for both internal and external application.

Standard equipment:

- Mortise latch and bolt lock,
- Stainless steel U-from handle set on long shield,
- Cylinder and 3 keys,
- 2 pieces of customised stainless steel hinges,
- 2 security pins,
- Perimeter rubber gasket and intumescent gasket.

Optional equipment :

- Additional hinge or alteration of hinges to 3D adjustable model,
- Anti-panic locks and hardware concordant with EN 1125 and EN 179,
- Door closers concordant with EN 1154,
- Electric and electromotor locks,
- Electric strike plates and magnet contact,
- Rectangular or round glass vision panels,
- Fire resistant ventilation grills,
- Kick-plates of stainless steel,
- Magnet holders,
- Automatic dropping gasket.

CHARACTERISTICS OF DOOR FRAMES HP

DFM DS model with hidden door rebate (door leaf and frame flush) are an innovative alternative for traditional flush doors. Here the aluminium double rebated frame plays a role, hiding the rebate of door leaf, which allows the construction of door leaf remain unchanged, minimising the cost of non-standard model.

Frames of **DFM DS..** are made of moulded aluminium in thickness 3mm, corner (Z) in standard with option of exchange to rectangular and wall embracing models, and including variants with thermal break bridges.

TECHNICAL DETAILS

Fire resistance:	EI ₂ 30 / EI ₂ 60
Smoke resistance:	S _a /S ₂₀₀

DOOR LEAVES

The general use **DFM DS** Steel Doors are constructed from two zinc plated steel skins 0.75mm thick, with rockwool infill with a density of 120kg/m³. The total thickness of door leaf is 65mm. The effective light weight of the door leaf minimises mechanical stress on the hinges, lock and door closer. This provides improving durability and service life.

Door leaves and frames are factory powder coated in a selected colour from our standard colour range.

DFM DS general use Doors are made in single and double leaf variants. They are suitable for both internal and external application.

Standard equipment:

- Mortise latch and bolt lock,
- Stainless steel U-form handle set on long shiled,
- Cylinder and 3 keys,
- 2 pieces of customised stainless steel hinges,
- Perimeter rubber gasket.

Optional equipment:

- Additional hinge or alteration of hinges to 3D adjustable model,
- Anti-panic locks and hardware concordant with EN 1125 and EN 179,
- Door closers concordant with EN 1154,
- Electric and electromotor locks,
- Electric strike plates and magnet contacts,
- Rectangular or round glass vision panels,
- Fire resistant ventilation grills,
- Kick-plates of stainless steel,
- Magnet holders,
- Automatic dropping gasket.

DOOR FRAMES

DFM DS. Door Frames are made of moulded aluminium in thickness 3mm, corner (Z) design as standard, with choice of rectangular and wrap-around frame profiles. An upgrade to include a thermal break is also available.

Not only is the 3mm aluminium frame more rigid than standard steel frames but it also provides an effective clear passage, wider than is the case with traditional steel frames.

Invisible angle connectors are used at the mitred joints on the frames. These weld-free joints achieve a quality aesthetic finish.

Moreover, aluminium door frames do not carry the risk of corrosion in external or other potentially wren environments.

PRODUCT DESCRIPTION

The door leaves of **DFM** DS EW 180 Steel Fire Resistant Doors are constructed from two zinc plated steel skins 0.75mm thick, with infill of mineral boards Tecbor and rockwool with a density of 140 kg/m³. The door leaf holds additional surface panel fixed on perimeter to form a total thickness 112mm. The edge of door leaf is double rebated, laid with sets of intumescent gaskets on its perimeter.

Door leaves and frames are factory powder coated in a selected colour from our standard colour range.

DFM DS Fire Resistant Doors are made in Single leaf variant only. They are suitable for both internal and external application.

Standard equipment:

- Mortise latch and bolt lock,
- Stainless steel U-form handle set on long shield,
- Cylinder and 3 keys,
- 4 pcs of customised stainless steel hinges 3D adjustable,
- 2 security pins,
- Perimeter rubber gasket and intumescent gasket.

Optional equipment :

- Anti-panic locks and hardware concordant with EN 179,
- Door closers concordant with EN 1154,
- Electric strike plates and magnet contacts,
- Kick-plates of stainless steel,
- Automatic dropping gasket.
